C64 ASSEMBLER

Inventor: xxxx **Year:** ~xxxx

Assembler Coding...

https://media.ccc.de/v/33c3-8029-the_ultimate_game_boy_talk

Calling it "Ultimate Talk" is ultimately correct, WOW really fu**** great Work

Use Cases

To learn Assembler and Computer Architecture the easy and funny way... with smooth SID-like sound :)

carrot (German: Zuckerbrot)

Inventor God **Year** ~0

German: Sugar not Carrot. Brain tells "child", you have to eat that again (because sugar has a lot of energy) so you want more sugar/carrots. Unfortunately, it is also possible, to use the carrot to lead the child into the wrong direction: for example, if someone would reward it, if one pulls the little sister at her hairs, this would be maybe "programmed" too. Parents who would do such crap, would deny the existence of **Behavioral "Sciences"**...

Use Cases

In every sweets store, every kiosk, every corner there are sugar-armed salesmen that argue, that they are Zacchaeus, chief tax-farmer and would claim that they are entitled take the money for carrots.

doctor's dignity (דוקטורט)

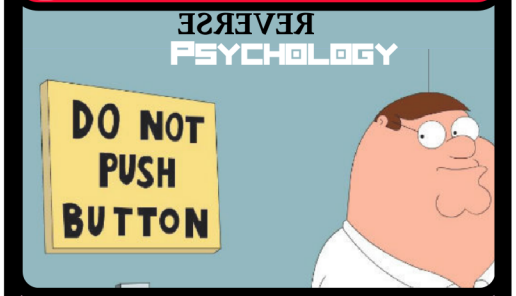
Inventor Satan / Pope Honorius III **Year** 1219

After the classic course through the gymnasium (n > 5 years) and about 10 years in a random university, one gets maybe a master's degree or the doctor's dignity, Requirements seems to be at least some random doctoral thesis in the the field of study, and in Computer Science maybe Rank 50 in Battlefield BC2 is also required but unsure which of both is essential... (me mues die Rössli clöpfe wo zied)

Use Cases

Well-functioning RUST™-BOTs / Zombis serving Satan and who are normally sitting on the right side of the

You ARE not INSANE



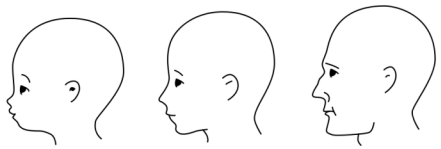
Inventor Satan **Year** ~1

One say with direct language: "you are AWESOME, you are not INSANE" and through an unseen acoustic/visual channel "IS A LIE", "You ARE insane", "I just want encourage you (unheard: you LOOSER)" reverse psychology eg. Patent US4877027 (since 1960: but not in TV or press). "Secretly", the adviser enjoys his "superiority" (= compensates his low self-esteem)

Use Cases

Criminalize & frighten the "insane", hush over economic crimes he discovered, practice psychological violence (⇨ causes dopamine release ⇨ causes behavioral addiction)

Scheme of childlike characteristics



Inventor Satan/Communism/Advertising industry

As with the Limbic System Vulnerability Hack, our brain is susceptible to the cute appearance of **children**. This is "used" by advertising as well as by people like Epstein. scientifically spoken: It is about "**Wahrnehmungspsychologie**", the shape of the head, which also reminds us of ourclassmate in our childhood

Use Cases

Sociopaths Ignorantly don't care about childrens future, if they can sell more junk they would even roast a child (just with an active denial system of course) if they can make more profit..., Yay Chinagadget of the week (traumatic childhood?)

Limbic System Vulnerability

Inventor Satan / Capitalism / Advertising Industry

Since we are genetically still over 90% identical to our ancestors that were driven by the limbic system (Neandertals, Monkeys, RUST™-Bots) our brain is vulnerable eg. to fat food, sex, slides. This is used by advertising industry, but also "used" for imposing your will on others.

Michael Foucault: "Human body and the human disposition in terms of the priority of sexual desire" (Euphemism)

Use Cases

A Sociopath does not care about the sexual integrity of others, his primary focus is to sell crap and he would also abuse the SCC BDSM card and ignore resulting consequences

Law article

§§§

Inventor Satan **Year** ~0

In the preamble of the Swiss Federal Constitution is written: **In the name of God!** We can therefore assume that for everything that went wrong, Satan produced an article for, and over the years he even produced laws and regulations that benefits a single supplier or cartel for a specific application, (for example, Swiss fire protection regulations)

Use Cases

Mark of Cain: If it has not worked out with religion, moral, hoesty and truth. (At the moment)

Vacuum/Electron tube

Inventor: Frederick Guthrie **Year:** ~1873

A vacuum tube or valve (Britain and some other regions), is a device that controls electric current between electrodes in an evacuated container. Vacuum tubes mostly rely on thermionic emission of electrons from a hot filament or a cathode heated by the filament. This type is called a thermionic tube or thermionic valve. Not all electronic circuit valves/electron tubes are vacuum tubes (evacuated); gas-filled tubes are similar devices containing a gas, typically at low pressure

Use Cases

As a Transistor today used for high friquency and high power amplifiers like radio stations
