## Police / Police car

Inventor Romans   **Year ~500**

Etymologically, the term police is derived from the Greek πόλις, polis "city". It referred to the entire public administration (today as "construction police" and "fire police") outside of Greece as the fashion word of the Romans. Chessman of the authorities, and in many countries the police are the group of people who commit the most murders. See also "Americans 58 Times More Likely to Be Killed by Cops Than by Terrorists"

Use Cases

Violence, riots, often conflict rather escalating, often intimidating, biased preserving only the power of the upper class

Quadrophonic

Front Speakers   REAR Speakers

Inventor JVC   **Year ~1970**

concreted in the apartment, cheats the preception so that the victim mind interprets the sounds as authentic, eg. neighbours

ControlUnit with 1990 Electronics / Technology:
2x Gravis Ultrasound Stereo
2x Sound_Blaster Stereo
4x LPT &&_JDAC / CENT_DAC

Use Cases

For Therapy (remanence); But unfortunately also to make people agressive (MKULTRA Killer) like dogs or to force them to fight against each other :(
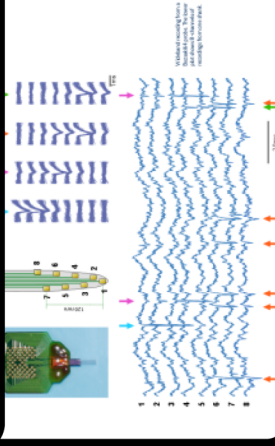

NeroNexus Implants

Inventor José Manuel Rodriguez Delgado ~**1950**

Originally developed by Delgado, now been developed "in secrecy" since 60 Years, (by companies that are not publicly know) placed directly in the brain, like OpenBCI with software for pattern recognition recognizes common patterns of the EEG, which can then be analysed. No matter how good the encryption is, all vulnerable to side channel attacks [$f_c = \lambda / 2$]

Use Cases

Lie detector, read thoughts & emotions, remote control, influence emotions, automate victims (possible

Stimoceiver

Inventor José Manuel Rodriguez Delgado ~**1950**

Can read data (like an EEG) as well as transmitting signals tod the brain and can activeate certain functions in the brain, e.g. In the Amygdala. You can find an Active community (read only, and non-invasive) on Twitter: @OpenBCI that tries to keep up with Satan's developments. Things like directly "built-in" Augmented Reality (Like PokemonGO) can be achieved technologies with more modern Technology like eg. Patent WO200505579A1

Use Cases

Lie detector, read thoughts & emotions, remote control, influence emotions, automate and control victims (representation eg like Google Maps 3D)
SkinnerBOX

Inventor B. F. Skinner   **Year ~1960**

Over electrodes on the floor he could give the mouse electroshocks = punishment / create punishment / aversion or animal cruelty ☹
By pressing the Button the mouse was rewarded with a biscuit = reward / incentives / reward / feeding ☺

The insane B.F. Skinner searched for **sequences** of **incentives** and **punishment**, to completely remote-control test-"object" and maybe also compensated his own low self-esteem by torturing animals or even kids, caused long-term damage

Spinal Cord Implant

Inventor Stuart Meloy   **Year ~1960**

Originally an implant in the spinal cord (medulla spinalis) that could force an orgasm, patented 40 Jears later 1999 under US6169924. Today encanced with more than just that "wire" (bad US Army researches in this field) Output; the kid can be "used" as a robot / soldier / killer or sex slave with a 3D model of the victim in a 3D environment (like games) they try to create a weapon much more powerful than a nuclear bomb :(

Use Cases

Mobile phone as UpLink to the mainframe (the US Army uses the Cry-Engine with PhysX) The RUST™-Engine

Microwave Hearing / Frey Effect

Inventor Allan H. Frey (Cornell Uni) **Year~1961**

"Hears non-existent voices,"hahaha an invisible communication channel, with pulsed microwaves transmitted and received wrety the control was 30 Years not patented until 1989 under US4877027. Technically it would have been possible to do this already with electron tubes (~1900). **Psychological Perspective**: people that abuse such technology would find that very funny and previously labeled as a "Schizophrenic" the victim is completely defenseless and it is likely that it will run suicide or amok someday

Use Cases

In combination with e.g. a loop recorder, the perpetrators often caused permanent damage in the psyche of their

3D GAME-ENGINE (eg. CryEngine)

Inventor Silas Warner   **Year ~1981**

Castle Wolfenstein (Muse Software)

Like a **SkinnerBOX**, but "incently" wrapped as children's toys, invasive and non-invasive technologies: eg. Modular NeuroNexus Bluetooth interface, uplink to quadrophony, similar to a network monitoring system with Plug-INs, which are partially not even accessable by the user.

Use Cases

Game, fun, for therapy or "therapy", psychological profile ⇒ psychological WARfare ⇒ to incite children to crimes (e.g., GTA) and then sue them it "legitimately"
