Access Based Enumeration

General | Sharing | Security | Web Sharing
Access-based Enumeration | Customize

Access-based Enumeration makes visible only those files or folders that the user has the rights to access. When Access-based Enumeration is enabled, Windows will not display files or folders that the user does not have rights to access.

☑ Enable access-based enumeration on this shared folder

Depending on the authorization, folders are displayed or not in the Windows Network Neighbourhood. Can easily also be applied on social media or other platforms. You need something to assign the user to a record eg. IP, Face Recognition, RFID.... Then you can eg. split the society: access based censorship, send people in the right or wrong directing (discrimination / Stanford prison "experiment")

Use Cases

Censorship, manipulation or "secrecy"
